Booktrust Recommendations

An Otter Called Pebble

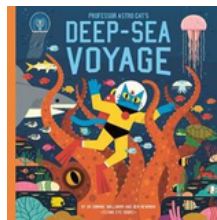

Click on the book covers for more information

This heartwarming tale of hope, kindness and determination will delight young independent readers with an interest in wildlife. The story contains lots of information about these protected creatures!

Professor Astro Cat's Deep Sea Voyage

Professor Astro Cat is back with his friends

Gilbert, Martha, Felicity, Evie and Astro Mouse, setting sail on an incredible deep sea voyage.

Astro Cat's team of animal explorers explain fascinating ocean facts to young readers in an accessible way.

Fabulous Fish Pie

Click here to see how to make this recipe and more.

This fish pie is warm and comforting, and can be made with any type of fish.

Ocean in a Bottle

Make waves with this mesmerising mini seascape by recycling an old bottle!

Click on the picture for step-by-step instructions

You will need:

- Clean clear bottle with lid
- Blue food colouring
- Funnel
- Vegetable oil or baby oil
- Small floating objects

Water can be great fun! But it can also be dangerous. The RLSS have lots of great water safety tips to keep you safe! Click [here](#) to find our more!

Always supervise children around water.

Ocean Life

The world's oceans are very important to life on Earth. They provide minerals, oil, and

Click on the wave to find out more ocean facts!

natural gas. The ocean is home to many animals (and plants) - the largest of which is the Blue Whale!

Can you name some other animals that live in the ocean?

Did you know that more wildlife lives around coral reefs than in any other part of the ocean?

The reefs provide the animals living there with everything they need, including food and shelter.

A lot of animals who live on the reef camouflage themselves to blend amongst the coral.

How to play

Mark out a circular course with string, pieces of paper or anything else you can find, and place a basket in the middle. Put tennis balls or crumpled up pieces of paper at each course marker.

Shout "I am mighty!" and set off around the course as fast as you can, throwing the ball into the basket when you reach the next marker.

If you miss the basket, stop and jump on the spot as high as you can 10 times.

When you finish the course, get the paper out of the basket and go again - this time try running around the course the other way, or only throw with your other hand. Keep playing for 10 minutes!
